Walk-in or over the phone reservations for single or group can be done by staff instantly and are automatically updated in the system.

Once the reservation details are entered by the staff, confirmation email is generated that can be emailed or hard copy can be printed in multiple formats. Automated email confirmation is sent by the system.

Housekeeping lets you track status of all the rooms in the hotel with Fusil HMS easy to understand GUI. Track rooms which require immediate attention and assign task to staff for quick fix pre guest arrival.

Upon guest's arrival, the front desk staff can easily check-in the reservation right from the main dashboard. Staff can use various parameters to quickly search the guests in the system by name, invoice No., Room Type, etc.

Easily organize all your reservations for group bookings; apply charges to the main folio or individual reservations. Assign color codes to specific groups for easy identification and assigning extra charges.

Create special rates and discounts for corporate clients which can be easily assigned to the folio or city ledger accounts for direct billing to the company.

Predefined extra charges (inclusions) are automatically added to the room folio and other unforeseen extra charges can be added manually to the folio.

Upon check-out, staff can apply any additional charges to the folio and accept payment in cash or credit. Furthermore, staff can easily generate a single folio for multiple rooms and split folio for a single room.

Generate multiple reports types and save them in various formats. In addition, special reports can be generated for corporate clients and agents.
